*Advances in Experimental Medicine and Biology* provides a platform for scientific contributions in the main disciplines of the biomedicine and the life sciences. This series publishes thematic volumes on contemporary research in the areas of microbiology, immunology, neurosciences, biochemistry, biomedical engineering, genetics, physiology, and cancer research. Covering emerging topics and techniques in basic and clinical science, it brings together clinicians and researchers from various fields.

*Advances in Experimental Medicine and Biology* has been publishing exceptional works in the field for over 40 years, and is indexed in SCOPUS, Medline (PubMed), Journal Citation Reports/Science Edition, Science Citation Index Expanded (SciSearch, Web of Science), EMBASE, BIOSIS, Reaxys, EMBiology, the Chemical Abstracts Service (CAS), and Pathway Studio.

2019 Impact Factor: 2.450 5 Year Impact Factor: 2.324

## Preface

The Iran Ministry of Health and Medical Education started an initiative in 2015 to advance health science by a decentralization program. As part of this national program, Kerman University of Medical Sciences (KUMS) was assigned to advance knowledge on health data modeling and forecasting. This book has been written and published in order to fulfill this mission with the support from KUMS and the Institute for Futures Studies in Health (IFSH) based at KUMS.
